DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 and 33, drawn to method and system for remote administration of smart cards, classified in class 713, subclass 201.
 - II. Claims 20-25 and 34, drawn to a method for secure access of a communication system, classified in class 713, subclass 159.
 - III. Claims 26-29, drawn to communication between two smart cards via a remote administrator, classified in class 713, subclass 200.
 - IV. Claims 30-32, drawn to a remote administrator in a communication system, classified in class 713, subclass 166.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as accessing and controlling portable data carriers; invention II has separate utility such as verifying a portable data carrier; invention III has separate utility such as electronic fund transfer; invention IV has separate utility such as access control to protected resource. See MPEP § 806.05(d).

Art Unit: 2132

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for one group is not required for any other groups, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include and election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
